

## A CONTINUATION OF CLASSROOM TRAINING

Based on the review of government guidance and other information relevant to the current coronavirus pandemic affecting the UK and having taken into account the restrictions in force and the requirements of clients in terms of their need to ensure that their essential workers are adequately trained in their key skills to perform their roles safely, we will continue to deliver COVID-19 secure classroom face-to-face training.

## STAYING COVID-19 SECURE DURING WORKPLACE TRAINING

-  We have carried out a thorough **COVID-19 risk assessment** on all aspects of training delivery and share the results with our training team and clients
-  Our trainers are equipped with **sanitising and disinfection cleaning materials** and fully prepare the room and training equipment prior to and after use
-  We have strict **handwashing, hygiene and equipment cleaning** procedures, for both learners and trainers, fully compliant with government guidance
-  We meticulously **maintain 2m social distancing** in all aspects of the training environment, including during practical scenarios and require all trainers to wear masks at all times during delivery
-  Course documentation such as the attendance register will be completed by the trainer only with no sharing of keyboard and tablets, to **manage transmission risk**

# ADDITIONAL MEASURES

## SOCIAL DISTANCING

Delegates are expected to keep 2m apart at all times. Maximum class size will be dictated by room size and ensuring a 2m distance. Trainers to wear a face mask at all times. Course documentation such as registers to be completed by trainers only and no pens or other objects to be shared.

## HYGIENE

Prior to the commencement of training, the trainer will wear disposable gloves and prepare the room and equipment for use. All training equipment and wipeable surfaces will be wiped down with sanitising wipes. Learners are encouraged to wash/sanitise hands frequently.

## OTHER

Where possible, windows and doors will be opened to provide additional ventilation and where the venue allows, parts of the training will take place outdoors. Learners who decline to comply with social distancing will be politely asked to leave.

## PRACTICAL TRAINING - OUR COVID-19 SECURE PLEDGE

Practical training with First Response Training is safe – we call it our 'COVID-19 Secure Pledge'.

For courses that have essential practical scenarios we always maintain 2m social distancing. Further, we will never demonstrate or permit practice techniques to be performed on another person. For the use of essential equipment highly effective 70% alcohol sanitising wipes will be used by learners prior to and immediately after each use, meaning equipment is sanitised twice between each use. Hand sanitiser is also provided within the classroom for use regularly throughout the course.

## FIRST AID TRAINING - ADDITIONAL MEASURES

For first aid training our hygiene and safety measures go even further. During use of the resuscitation training manikin we also provide each learner with an individual use protective face shield which is applied to the manikin by the learner before use and provides a totally safe protective screen between the learner and the face of the manikin. This allows for completely safe rescue breaths to be performed and for the learner to practice the essential rescue breaths required for effective cardio-pulmonary resuscitation.
