

## THE RETURN TO CLASSROOM TRAINING

Based on the review of government guidance and other information relevant to the current coronavirus pandemic affecting the UK and having taken into account the restrictions in force and the requirements of clients in terms of their need to ensure that their essential workers are adequately trained in their key skills to perform their roles safely, we have commenced COVID-19 secure classroom face-to-face training.

SETTINGS

## STAYING COVID-19 SECURE DURING WORKPLACE TRAINING

We have carried out a thorough **COVID-19 risk assessment** on all aspects of training delivery and share the results with our training team and clients

Prior to the commencement of training, we ask that the venue will **prepare the training room** by wiping all contact surfaces with antibacterial wipes or spray.

We have strict **handwashing, hygiene and equipment cleaning** procedures, for both learners and trainers, fully compliant with government guidance

We meticulously **maintain 2m social distancing** in all aspects of the training environment, including during practical scenarios

Course documentation such as the attendance register will be completed by the trainer only with no sharing of keyboard and tablets, to **manage transmission risk**

# ADDITIONAL MEASURES

## SOCIAL DISTANCING

Delegates are expected to keep 2m apart at all times. Maximum class size will be dictated by room size and ensuring a 2m distance. Course registers to be completed by trainers only. Trainers will arrive in a face mask and wear one at all times excluding within the training room when seated at least 2m from all delegates.

## HYGIENE

Prior to the commencement of training, we ask that the venue will prepare the training room by wiping all contact surfaces with antibacterial wipes or spray. All training equipment and wipeable surfaces will be wiped down with sanitising wipes. Learners are encouraged to wash/sanitise hands frequently.

## OTHER

Where possible, windows and doors will be opened to provide additional ventilation and where the venue allows, parts of the training will take place outdoors. The vast majority of our training team have been vaccinated and all trainers complete recorded LFT testing twice weekly.

## PRACTICAL TRAINING - OUR COVID-19 SECURE PLEDGE

Practical training with First Response Training is safe – we call it our 'COVID-19 Secure Pledge'.

For courses that have essential practical scenarios we always maintain 2m social distancing. Further, we will never demonstrate or permit practical techniques to be performed on another person. For the use of essential equipment highly effective 70% alcohol sanitising wipes will be used by learners prior to and immediately after each use, meaning equipment is sanitised twice between each use. Hand sanitiser is also provided within the classroom for use regularly throughout the course.

## FIRST AID TRAINING - ADDITIONAL MEASURES

For first aid training our hygiene and safety measures go even further. During use of the resuscitation training manikin we also provide each learner with an individual use protective face shield which is applied to the manikin by the learner before use and provides a totally safe protective screen between the learner and the face of the manikin. This allows for completely safe rescue breaths to be performed and for the learner to practice the essential rescue breaths required for effective cardio-pulmonary resuscitation.
